 Foundation (AATF) 257
agricultural biotechnology
 (see *Bt*, Roundup Ready®)
 acceleration of evolution, 207
 adoption rapid, 18
 advantages of traditional breeding, 236
 allergen removal, 98
 alternative hosts as refugias, 171
 anther culture, 251
 apomicts, 27
 benefits for consumers, 40
 brief history, 142
 coexistence with organic agriculture, 17
 corporate driven, 60–61
 cause and consequence of change, 40–42
 consumer issues, 22, 27
 critical for Africa, 168–169
 crop diversity enhanced, 109, 110
 cross-protection, 224, 228, 231
 crossroad now and then, 179, 180
 cultural aspects, 103
 decreases operating costs, 89
 developing countries, 5, 245, 246–247
 driver of acceptance, 4
 driving forces, 4
 economics, 16, 93
 engaging stakeholders, 187
 ethical/religious issues, 5, 14, 17, 19, 20
 farmer benefits, 13,
 a failure, 4, 27
 free of antibiotic-resistance genes, 170
 free of herbicide-tolerance markers, 170
 gene escape, 17, 20, 31, 96, 102
 industrial products, 142
 industry benefits, 17
 liability concerns, 192–193
 marker-aided selection, 251
 nonpecuniary benefits, 93
 not the solution to hunger and poverty,
 246–247
 nutritional improvement, 98
 opportunities for developing countries,
 250–254
 pharmaceutical crops, 19, 27, 33, 44, 108,
 113–114, 142, 191–195
 moratorium called for, 194–195
 non-food species called for, 195
 require segregation, 151
 sabotage 193
 pro/anti debate, 6, 53
 about science? 54–55
 contentiousness, 16
 consensus re sustainability, 19
 need for common ground, 22
 product differentiation, driving forces,
 142–143
 quantitative trait loci (QTLs), 252
 scientists' arrogance, 217
 social factors, 13, 20
 time saved, 14, 91
 tissue culture, 250–251
 tolerance levels needed, 17
 a tool among many, 14, 60
 two-world economic model, 215
 valid only as last resort? 228
 yield increases or lack thereof, 30, 89
